## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's response to the office action filed on May 20, 2003 has been entered. The claims pending in this application are claims 20, 22, and 24-47.

### ***Election of Species***

2. In view of the amendment filed on May 20, 2003 and newly added claims 35-47, this application contains claims directed to the following patentably distinct species of the claimed invention:

- (1) the SNP is associated with a disease (claims 27 and 31)
- (2) the SNP is associated with the efficacy of a drug (claims 28 and 32)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are claims 20, 22, 24-26, 29, 30, and 33-47.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations

Art Unit: 1634

of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. This application also contains claims directed to the following patentably distinct species of the claimed invention:

- (3) the ligation is blocked by introducing a gap of at least one nucleotide between one strand of the adaptor and one strand of the fragment (claim 42)
- (4) the ligation is blocked by the absence of a phosphate at the 5' end of an adaptor strand (claim 43)
- (5) the ligation is blocked by the presence of a modified nucleotide at the 5' or 3' end of an adaptor strand (claims 44 and 45)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are claims 20, 22, 24-41, 46, and 47.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon,

including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. This application also contains claims directed to the following patentably distinct species of the claimed invention:

(6) the ligation is blocked at the 5' end of one strand of one adaptor and at the 3' end of one strand of the other adaptor (claim 46)

(7) the ligation is blocked at the 5' end of both strands of one adaptor and at the 3' end of both strands of the other adaptor (claim 47)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims 20, 22, and 24-45.
